CREATE YOUR OWN CRAYONS

Give your broken crayons new life with this fun DIY project!

WHAT YOU'LL NEED:

- Broken crayon pieces, with the paper wrappers removed
- Silicone mold
- Oven

HOW TO DO IT:

1. Preheat the oven to 200° F with the help of an adult.
2. Figure out what kind of crayons you want to make! Decide if you want to create crayons with a single color, multiple colors or even a crayon that has colors like the ocean or the leaves on a tree.
3. Place the broken crayon pieces into the silicone mold. If you don't have a silicone mold you can use a baking tin, but make sure to coat it with vegetable oil so the crayons you create are easy to remove.
4. Place the mold in the oven and bake for 7-10 minutes. Keep an eye on it and remove when the crayons are all melted.
5. With the help of an adult, remove the mold and let sit for a few hours to let the crayons harden. You can also put the mold in the freezer to speed up this process.
6. When the crayons are hard carefully remove them from the mold and have fun creating!
